Douala, Cameroon

Full-stack developer since 2019, I design and ship web and mobile products for startups, agencies and public institutions, from idea to launch. My core stack is React (Next.js, React Native), TypeScript, Node.js (AdonisJS) and Laravel. I also build AI into products: LLM features, agents that use real tools, RAG on company data and MCP servers. I'm used to working remotely with teams in Africa and Europe.

Experience

Nov 2025 – Present
Remote
Current

Activ'VAE

Full-Stack Developer

Platform for managing and supporting VAE journeys (Validation of Acquired Experience)

- Administration back-office: users, documents, training and messaging
